

商品樣張

商品名稱	擠痘痘玩具
材質	玩偶(矽膠)、針頭(筒)(金屬/塑膠)
照片	 The image consists of two side-by-side black and white photographs. Both photographs show a person's hand holding a syringe-like tool with a needle attached. The tool is being used to squeeze a pimple on the face of a small, light-colored doll. The doll's face is the focus of the action, with the needle tip pressed against the skin near a bump. The background is a textured, light-colored surface.
